SUMMARY

Software engineer with four years of experience building and shipping full-stack, cloud-native applications, much of it in financial technology. Eager to apply that background to designing and delivering production software that solves real business problems.

PROFESSIONAL EXPERIENCE

Valmar Holdings

6400 Sheridan Dr. Suite 120, Williamsville, NY 14221

Software Engineer III

JUN. 2024 – PRESENT

- Pioneered and led development of AWS-native (Lambda, S3, RDS, DynamoDB) serverless payment processing software, owning solutions from prototype through production support.
- Created full stack (React, Go, AWS) platform responsible for movement of millions weekly across transaction channels.
- Developed robust packet-driven TSYS Sierra integration (Go, AWS) to support movement of funds via debit card.
- Integrated third-party OPN and Shazam APIs to provide support for Real-Time Payment (RTP) and Push2Card (P2C) transaction channels.
- Designed and shipped LLM-powered features in production payment software, integrating third-party model APIs to automate manual review and data-extraction workflows.
- Led the company through its recent PCI and SOC 2 audits, achieving compliance in both and establishing governance, security, and operational-readiness standards for production systems.
- Supported infrastructure and office operations through system administration and hardware support as direct stand-in to the Chief Information Security Officer (CISO).

Project: RCC eCheck Processing — C#, Go, Java, AWS (Lambda, DynamoDB, S3), React

JUN. 2024 – MAR. 2026

- Optimized an hours-long manual eCheck transaction process by programmatically creating X937 files for printing and scanning, enabling the company to process thousands of checks daily.
- Built a custom C# driver and DigitalCheck scanner API integrations, replacing a manual industry workflow with an automated, end-to-end pipeline.

LCI-AE.COM LLC

5651 Main St., Williamsville, NY 14221

Full Stack Engineer

MAY 2022 – MAR. 2024

- Spearheaded development of new full stack (React, Django, Docker, MSSQL Server) application for member management of local union clientele.
- Worked closely alongside customers to translate business requirements into delivered features, managing requests and maintaining strong business relations.
- Introduced Agile and SCRUM methodologies to system operations and development efforts.

TECHNICAL SKILLS

- **Languages:** Go, C#, TypeScript/JavaScript, Java (OOP), SQL, Rust, C, PHP, HTML, CSS
- **Cloud & Infrastructure:** AWS (Lambda, S3, DynamoDB, RDS, Aurora, EC2, ECS, SAM, CloudWatch, CloudFormation), Azure, Entra, Intune, Docker, NGINX, Linux, Virtual Machines
- **Frameworks & Data:** React, SvelteKit, TailwindCSS, Django, Vite, NPM, PostgreSQL, MSSQL Server, DynamoDB
- **AI & Developer Tooling:** LLM API integration, retrieval-augmented generation (RAG), MCP, Claude Code, GitHub Copilot, Codex, ChatGPT
- **Practices & Tools:** Agile, SCRUM, Kanban, Waterfall, Jira, Trello, Git/GitHub, SOC 2, PCI DSS, encryption, Microsoft Office

EDUCATION

University at Buffalo

Buffalo, NY 14260

Bachelor of Science, Computer Science | GPA: 3.5 - Magna Cum Laude

AUG. 2020 – MAY 2024

Project: Wi-Fi Based Localization — Kotlin, MQTT, Docker, MapBox, Android Studio

JAN. 2022 – JUN. 2022

- Managed a team of 5 students to develop the MLMap mobile application.
- Leveraged Wi-Fi based localization and mapping to route users to rooms throughout campus buildings.
